

INNOVATIVE LIFTING SYSTEMS FOR MOTORHOME BIKE CARRIERS: DRIVE OFF WITHOUT STRAINING!

Let the tecklift do the work for you!

Do you need to lift heavy e-bikes or bicycles up to the transport height of your motorhome? That's no longer necessary.

The tecklift makes it easy for you:

you can either convert your existing bike carrier into a comfort model with lifting function or install a completely new lifting system. In both cases, the tecklift lowers and raises electrically. This makes loading and unloading your e-bikes or bicycles very easy. Your back will thank you! Mount the tecklift connect between the rear of your motorhome and your existing bike carrier. The flexible tecklift is simply attached to the mounting points on the rear of the vehicle. Then, your bike carrier is hung from the tecklift. Optionally, the tecklift can be converted into a lifting system with carrier function. After connecting to the 12-volt onboard power supply, you're ready to go.

tecklift connect – Your universal adapter for most bike carrier systems

The universal adapter converts your bike carrier into a comfort model that makes transporting your bicycles or e-bikes much easier. No more straining to lift your wheels up to transport height: the tecklift connect

takes care of it for you. Quickly, quietly, and without putting strain on your back.

tecklift carry – Your individual lifting system with carrier function for two e-bikes

Do you not have a bike carrier or want to replace yours? The tecklift carry is a lifting system and carrier for two e-bikes in one. Mount the tecklift carry at the rear of your motorhome.

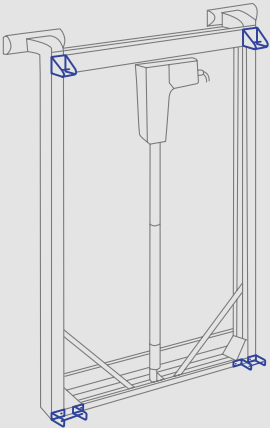

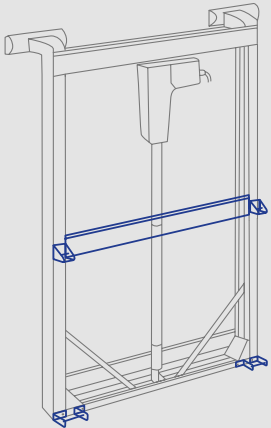

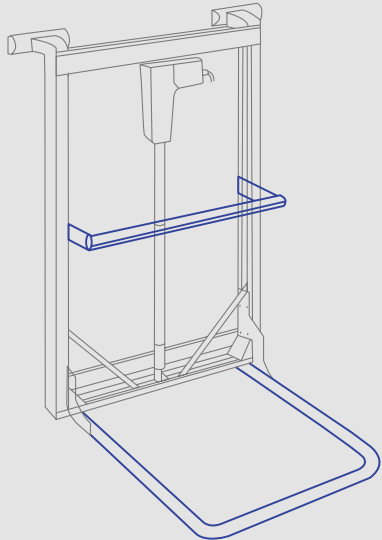

Choose bike rails and holders that fit your e-bikes or bicycles. Your lifting system with carrier function is ready for use. Individual, lightweight, and close to the rear of the vehicle. Drive off without straining!

The benefits

- comfortable, fast, quiet
- high-performance linear motor
- space-saving
- weather-resistant
- self-lubricating and maintenance-free
- attachable to your motorhome's original mounting points
- vertically adjustable mounting from 70 to 150 cm to fit your motorhome
- distance to the rear wall is adjustable
- complete with switch, cable set, and fastening material.
